PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science and Business Systems student with a strong foundation in **Python, SQL, object-oriented programming, software development, debugging, problem solving, data analysis, database management, and data processing**. Experienced in practical software development and data-driven applications, with exposure to cloud computing, data pipelines, structured data, and analytical techniques. Strong analytical, teamwork, communication, adaptability, and time-management skills with an interest in developing clean, maintainable software and data solutions.

TECHNICAL SKILLS

Programming: Python, SQL
Data Engineering & Analytics: ETL, Data Processing, Data Cleaning, Data Transformation, Data Pipelines, Data Analysis, Pandas, PySpark, SparkSQL
Databases: MySQL
Cloud: Cloud Computing, Oracle Cloud, Cloud Data Fundamentals
Tools: Git, GitHub, VS Code, Google Colab
Core Concepts: Object-Oriented Programming, Problem Solving, Debugging, Software Development, Database Management
AI: Generative AI (GenAI), Google Gemini AI

EXPERIENCE

Walmart Advanced Software Engineering Virtual Experience Program — Forage | 2026
- Completed practical engineering tasks involving problem solving, debugging, software design, system design, and development workflows.
- Practiced structured problem solving and software development workflows through practical tasks.
- Strengthened development practices applicable to software and data-oriented environments.

PROJECTS

Sales Data Analytics Pipeline using Python, PySpark, SparkSQL & GenAI
- Built a sales data analytics pipeline using Python and PySpark for data ingestion, cleaning, transformation, and analysis.
- Used SparkSQL/SQL to query, transform, organize, and analyze structured sales data for analytical reporting and business insights.
- Applied GenAI to support natural-language analysis and meaningful insight generation from processed sales data.

AI-Powered Tourist Guide Data Application
- Developed an application using Python, SQL, React.js, Node.js, and Google Gemini AI.
- Integrated structured data handling and backend services to support personalized recommendations and itinerary generation.
- Worked with application data flows and SQL-based data storage.

Student Record Management System | Python, MySQL
- Developed a Python-based application to add, update, search, and manage student records.
- Used MySQL for structured storage and retrieval of student information.
- Applied object-oriented programming, SQL queries, input validation, and exception handling.

EDUCATION

B.Tech - Computer Science and Business Systems | 2023–2027
Ramco Institute of Technology — **CGPA: 6.93**
Relevant Areas: Database Management, Cloud Computing, Data Analysis, Programming, Data Processing
Higher Secondary Certificate (HSC) | 2022–2023
PACM Higher Secondary School — **Score: 80%**

CERTIFICATIONS

- Oracle Certified Foundations Associate
- Cloud Computing — Oracle
- Microsoft Azure Essentials
- Advanced Python — Internshala AI
- Machine Learning — Infosys Springboard
- Full Stack Development — Lernoverse

ACHIEVEMENTS

- **First Prize — Prompt Prodigy Challenge (2026)**, AI Academia on Unstop; 1,000 cash prize for excellence in AI prompt engineering.

SOFT SKILLS

Problem Solving • Analytical Thinking • Leadership • Teamwork • Communication • Adaptability • Time Management
